

## **Dietetic Internship Program Goals and Outcomes**

### **Goal 1: Prepare graduates to become successful, competent registered dietitians.**

Outcome 1: Over a five year period, the pass rate for DI graduates taking the registration examination for the first time will be at least 80%.

The first time pass rate for the 2009-2013 five year period is 88%.

Outcome 2: Over a 3 year period, 70% of DI graduates who sought employment in dietetics will be employed within 12 months of program completion.

An average of 92% of our graduates are employed in dietetics.

Outcome 3: Over a five year period, 90% of employers/supervisors who responded to the survey will express satisfaction with the performance of the FSU DI program graduates.

100% of employers who responded to our surveys have expressed their satisfaction with the performance of the internship graduates.

### **Goal 2: Provide interns with a quality education and experiential learning which will facilitate completion in a timely manner.**

Outcome 1: Over a 5 year period, 90% of enrolled students will complete the program requirements within three years of their start date.

In the past 5 years, 97% of the interns completed the program within 3 years of their start date.

Outcome 2: Over a five year period, 80% of DI graduates will agree that their internship experiences enable them to successfully perform in an entry level position in dietetics.

Of the graduates who responded to our surveys, 95% of the respondents agreed that their internship enabled them to successfully perform entry level responsibilities in dietetics.

Outcome 3: Over a five year period, 80% of DI interns will agree that their dietetic internship experiences provided opportunities to practice core competencies expected of entry level dietitians.

The graduates of this program agreed that that this internship provided them with opportunities 97.5% of the time to learn the core competencies expected of entry level dietitians.
